Equipment

"Since It Will Be Disturbing To Everyone No Flash Allowed"

- 1) Small flashlights can and should be used.
- 2) Tripods should also be part of our equipment. Time exposures will be around 20-30 seconds at low ISO's. We would also suggest other ways of being creative by using Roscolux filters. They do make a kit with a lot of different filters you could hold in front of your flashlight.
- 3) Your lens of choice for Canon users 17-40MM or 24 -105MM. All other camera lens should be about the same. Please don't bring a lot of equipment it isn't necessary.
- 4) Do not wear loose fitting clothes in the caverns.

This is a very creative workshop... practice image stacking, HDR, and painting with light. Most of all have fun. You will have two hours per room so spread out and enjoy the experience.
